Work Experience

Sr. Software Engineer at NeonOne

Jun 2019 to Present

Worked with several development teams to to build multiple products with test-driven and documented APIs. All applications are built as single-page applications (SPAs) with Vue.js w/ Bootstrap (or Tailwind) as the front end, MySQL for our databases, AWS server stack and Laravel/PHP on the backend. We work in an agile scrum environment and have adopted Git flow as our version control process.

Software Engineer II at Wolters Kluwer

Oct 2015 to Jun 2019, 3 yrs 9 mos

Worked closely with design team and product owner on a small dev team to engineer interfaces for the Emmi Manager 2 platform. Created prototypes to help convey concepts and sell solutions to the team. Helped bring the legacy StartEmmi application up to ADA accessibility standards and helped re-build legacy StartEmmi front-end using React.

Business & Technology Consultant at Robert Half Technology

Jul 2014 to Aug 2015, 1 yr 2 mos

Norton Agency - Built several client websites in Wordpress. Helped create Norton's company website. Helped migrate servers from RackSpace to Digital Ocean / ServerPilot. Set up deployment and version control (Git) process.

Disney - Worked on the Disney Mobile Store to create in-store reservations. Built out mock services to test the API calls before the API went live. Built an in-line SPA (single page application) to handle viewing of the order reservations.

Nokia - Modified existing site templates on the Here Navigation platform to fix design bugs in CSS where none of the HTML could be modified. This required in-depth exercise of CSS and often creative CSS workarounds to difficult layout problems.

PHP Developer at AIS, Inc.

May 2013 to Jul 2014, 1 yr 3 mos

Managed and built out modules, logic and reports for in-house CRM based on PHP/Smarty Template Engine/Custom MVC. Maintained 250+ websites using various frameworks and technologies including Wordpress, CMS Made Simple, Zend Framework, Code Igniter, Drupal, etc. Facilitated as project manager on several web application build outs.
